EDUCATION

University of Illinois - Urbana-Champaign

Bachelor's, Applied Mathematics

August 2013 - December 2016

PROFESSIONAL EXPERIENCE

Discord

Remote

Senior Software Engineer, Tech Lead

November 2024 - Present

- Spearheaded the design and implementation of advanced Apple Billing integration, including Storekit v2 upgrade and Advanced Commerce API, increasing revenue capture by 15% and enhancing user experience
- Uncovered critical fraud vulnerability in Apple Billing integration, preventing \$10M+ in potential revenue loss through rapid detection system deployment
- Led and mentored a team of 3 engineers in full-stack development, resulting in accelerated project delivery and expanded technical capabilities across Revenue Infrastructure initiatives
- Architected and drove roadmap development for Subscriptions platform, prioritizing high-impact features while reducing operational costs by \$1M+ through process optimization and automation

Senior Software Engineer

April 2024 - Present

- Engineered and deployed the Collectibles platform across Android and iOS, generating \$2M+ in annual revenue while ensuring seamless cross-platform functionality
- Developed comprehensive Discounts platform architecture enabling multi-million dollar revenue through targeted experiment capabilities and enhanced customer conversion
- Modernized Google Play Billing infrastructure to version 7, implementing server-side validation and advanced fraud prevention measures, reducing support tickets by 30%

Software Engineer

May 2022 - Present

- Created robust foundations for the Revenue Infrastructure team's Subscriptions platform, establishing scalable systems supporting millions of concurrent users
- Delivered cross-functional iOS and Android development expertise, ensuring consistent user experience and purchase flow across mobile platforms
- Optimized cost-heavy processes in billing workflows, reducing engineering hours by 40% and improving system reliability with 99.9% uptime for payment processing

Venmo

Chicago, IL, USA

Senior Software Engineer

March 2020 - April 2022

- Backend lead for Credit Card Referrals program, processing thousands of referrals
- Feature lead for an automated process to reissue expiring debit cards for users, currently processing 300k+ debit cards per month
- Launched Cash-a-Check for direct deposit stimulus checks on Venmo
- Helped launch Venmo Credit Card; built repayments, autopay, and operational dashboards
- Fixed and improved Venmo CircuitBreaker to PayPal, strengthening HTTP call failure handling
- Subject Matter Expert for AWS on my team, consistently consult for new projects in the space

Amazon

Seattle, WA, USA

Software Development Engineer

March 2017 - November 2019

- Research, design, and implement highly scalable and available applications for vending catalog data to the supported devices for Prime Video.
- Built and maintained data pipelines to export Prime Video data to third party clients
- Helping create a new process to recommend UX Language for the Amazon Video platform
- Researching, designing, and implementing 2 services with multiple APIs to select the preferred language for a customer and a device
